

# Automation Demo Topologies

---

<https://github.com/JNPRAutomate/JNPRAutomateDemo-Student/>

# Base Topology

| Pod Details     |                      |
|-----------------|----------------------|
| Pod Number:     | <input type="text"/> |
| lo0 IP Address: | <input type="text"/> |
| st0 IP Address: | <input type="text"/> |

# Useful Commands and Links

## Vagrant Commands

- **vagrant up**
  - Start VM topology
- **vagrant suspend**
  - Put VMs into suspend mode, and maintain state
- **vagrant halt**
  - Power down and but do not delete all VMs in current directory
- **vagrant destroy**
  - Power down and delete all VMs in current directory
- **vagrant global-status**
  - Display a list of all Vagrant VMs currently running on the system

## Ansible Commands

- **ansible-playbook**
  - **-i <inventory file>**
    - Set which inventory file to use for the Ansible run
  - **-u REMOTE\_USER**
    - Connect as this user (default=vagrant)
  - **--ask-pass**
    - Prompt for user for SSH password to use for Ansible run
  - **--list-hosts**
    - outputs a list of matching hosts; does not execute anything else
  - **-V or -vvv**
    - Verbose mode (-vvv for more, -vvvv to enable connection debugging)
